Nikolai Vuchkov

Senior Front-End Engineer

Ruse, Bulgaria • nikolaidot.com • Email me • LinkedIn • GitHub

Open to: Full-time remote/hybrid in Ruse • Freelance projects & contract roles

Senior front-end engineer with 17 years of experience building and maintaining production web applications, the last decade in React, Vue.js and Angular codebases. Experienced across the full delivery cycle: architecture, code reviews, design systems, testing, CI/CD and release. Working directly with product, design and back-end teams. Author of LunarCSS, an open-source classless CSS theme, and the starter templates built on it.

Languages & Frameworks: JavaScript • TypeScript • React • Next.js • Astro • Vue.js • Nuxt • Angular • Node.js

Styling and UI: HTML5 • CSS • Sass • Tailwind CSS • Bootstrap • Design systems • Storybook • WCAG 2.1 AA accessibility • Responsive design

Engineering practices: Code review • Git/trunk-based development • CI/CD pipelines • Unit and component testing • E2E • SSR/SSG • SEO

Others: Figma-to-code • WordPress theme development • REST APIs • Unix/Linux environments • AI-assisted development workflows (Claude, Copilot, Cursor)

Open Source: Creator of LunarCSS (Apr 2026 - Present)

- Created LunarCSS, a classless CSS theme on npm that styles every standard HTML element with element selectors only, in about 10 kB gzipped - Showcase • GitHub
- Designed its token system (primitives → light/dark → semantic) with light-dark() and color-mix(), inside a cascade layer so consumers' CSS always wins
- Built accessibility in: visible focus, reduced motion, WCAG AA contrast, Windows forced-colors support
- Built Lunar Blog, a free Astro starter on the theme with no client-side JavaScript and no classes in its markup, and used it to find and fix theme gaps before release - Demo • GitHub

CSS • Sass • Design tokens • Astro • Vite • GitHub Actions • npm

Senior Software Engineer at Wiser Technology (Nov 2025 - Apr 2026)

Built an internal React/Next.js application with authentication, real-time data and system integrations, and a Storybook component library

React • Next.js • Storybook • Cursor

Freelance Front-End Developer (Apr 2021 - Present)

- Front-end development for a high-performance trading platform
- Designed and developed the landing page for a Web3 startup
- End-to-end design and development of a WordPress site for a dental clinic - Ro-Dent

- Developed the front-end architecture for an appliances and electronics repair platform and its white-label system, with a custom theme and config for each tenant - Service Box • Service Box Item Registration
- Designed and developed a data analytics tool for professional gamers to track and optimise performance

`React` • `Next.js` • `Vue.js` • `Nuxt` • `WordPress` • `Figma` • `GitHub Copilot` • `PrimeReact` • `React Hook Form` • `HTML` • `CSS` • `Web Animations`

Front-End Web Developer at 1ForFit (Jul 2020 - Mar 2021)

Developed multiple Vue.js projects from scratch - ok.easyketo.diet • ok.yourketo.diet

`Vue.js` • `HTML` • `CSS` • `JavaScript` • `Bootstrap`

Senior Front-End Web Developer at BlagoSoft (Nov 2016 - Apr 2020)

Developed Angular applications leveraging ngrx/store for state management, server-side rendering for SEO and performance, and REST API integration - Bobtail • ilFLS

`HTML` • `CSS` • `JavaScript` • `Bootstrap` • `Angular`
